

Harald versteeg

Graduated from utrecht university as a geologist/geochemist in 1994. After a few years working for an environmental consultancy company he started his career with Rijkswaterstaat, the executive agency of the Dutch Ministry of Infrastructure and watrmanagement.

After working as a specialist on building materials he became a middle manager in the fields of dredging, surveying and information management.

His main experience with procurement dates from the time he was responsible for the dredging projects on the North Sea and coastal maintenance. 2010 to 2015 he was the program manager of the Rijkswaterstaat sustainability program. Using the procurement process to stimulate the suppliers to develop more sustainable products and services was one of the topics he worked on. Harald played a role in the introduction of the CO2 performance ladder as a part of the sustainable procurement strategy of Rijkswaterstaat. He is still a member of the Central College of Experts (CCvD) for this certification scheme.
