# A Well-Connected Country

## “Best European Middle Size Region in Connectivity”

(fDi - European Cities and Regions of the Future - Ranking 2016-2017)

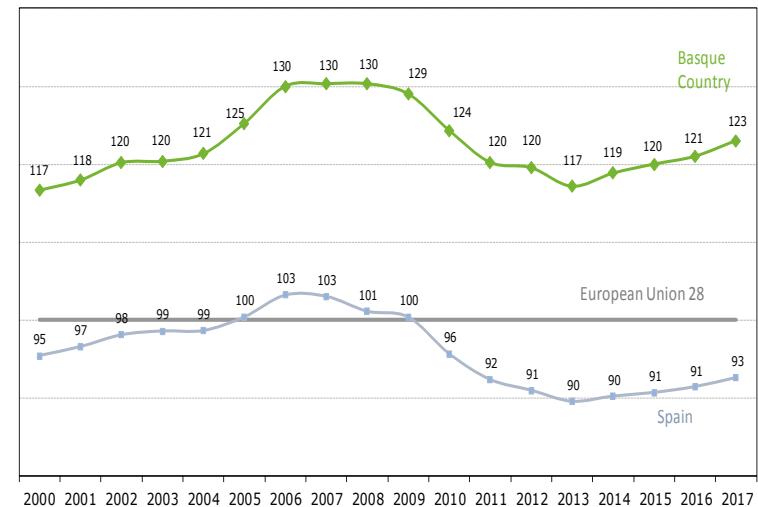

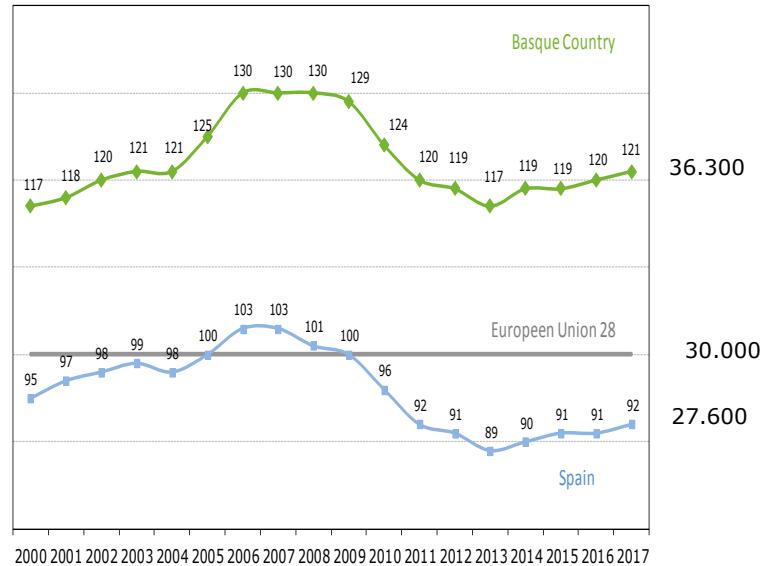

- ✓ Logistics
- ✓ International Airports
- ✓ Railway connections
- ✓ Motorways

# A dynamic economy that stands out in Europe.

- In general, the Basque GDP per inhabitant, measured in PPP, is 20% higher than that of the European average and is 30 points higher than the Spanish average.
- The provisional data for 2018 suggests that we are improving with respect to the European average.

## GDP per capita in PPP

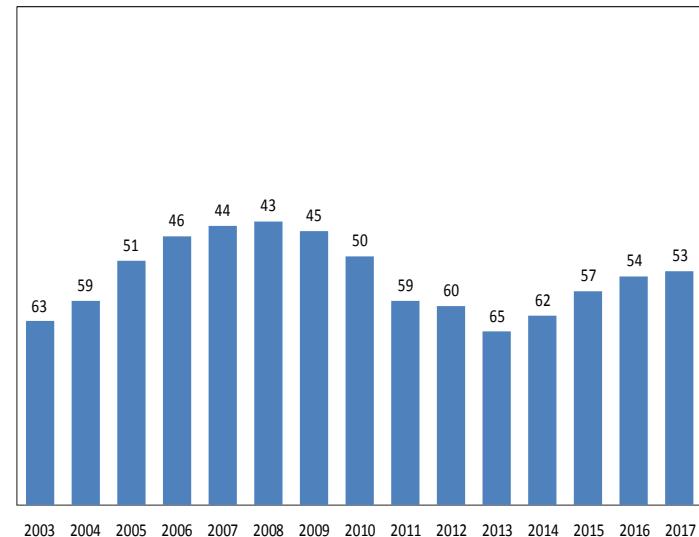

Source: Own preparation with Eurostat data.

# Recovering positions in the European ranking

- In the ranking of 281 European regions (NUT II), the Basque Country was ranked 53<sup>rd</sup> in 2017.
- Before the crisis, we reached 43<sup>rd</sup> position and subsequently went down to 65<sup>th</sup> position. In recent years, we have gone up several positions and the improvement will have continued in 2018.

# The Basque Country is the second most advanced autonomous community

- The data for 2017, the latest published by the INE, clearly shows that we are still in the second position in GDP per capita, behind Madrid.
- The capitals of a European state usually have some advantages over the rest.

GDP per capita in 2017

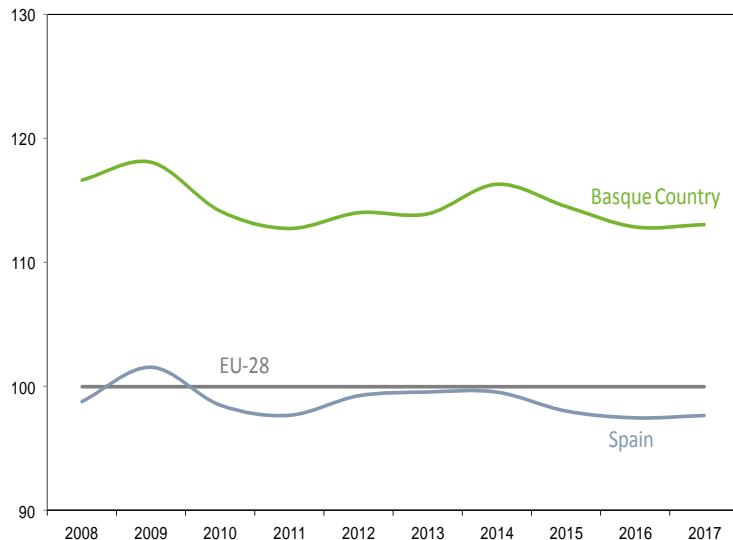

Source: INE. Base 2010. Regional Accounting December 2018.

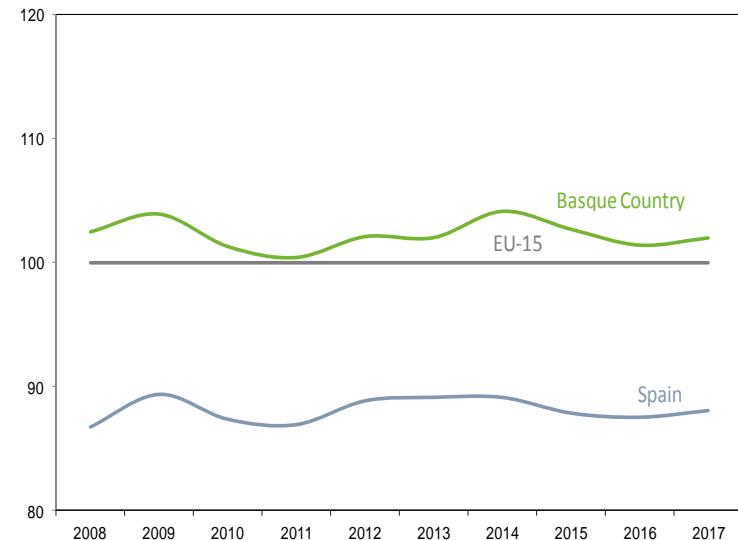

# The Key to Competitiveness: High Productivity

- Productivity per hour worked in Basque Country, also measured in PPP, is significantly higher than the Spanish and European average. If the comparison is made with the most cutting edge Europe (EU-15), a slight loss can be appreciated with the crisis and a subsequent recovery. We are slightly above the average of the most advanced European countries.
- The greater importance of industry in our production structure partly explains this increased productivity as industry is precisely the most productive sector.

## Productivity per hour worked

Source: Eurostat and INE.

# High productivity beyond industry

- Greater productivity is not exclusive to industry but can also be appreciated in other sectors: construction, primary sector, financial activities, real estate activities, etc.
- By contrast, Basque productivity is worse in information and communications, in professional activities and in artistic activities.

## Productivity per hour worked

	Euros			PPP		
	2000	2008	2017	2000	2008	2017
Total	95.5	107.2	102.7	113.1	116.7	113,1

# High Competitiveness: Ceprede Regional Indicator

- It is made up of 18 partial indicators classified into 5 large groups: macro-economic aspects, job market, business development, infrastructures and innovation.
- In this indicator, the Basque Country was at the top in four blocks and second in innovation, behind Navarra, in 2018.

## Regional competitiveness indicator in Spain

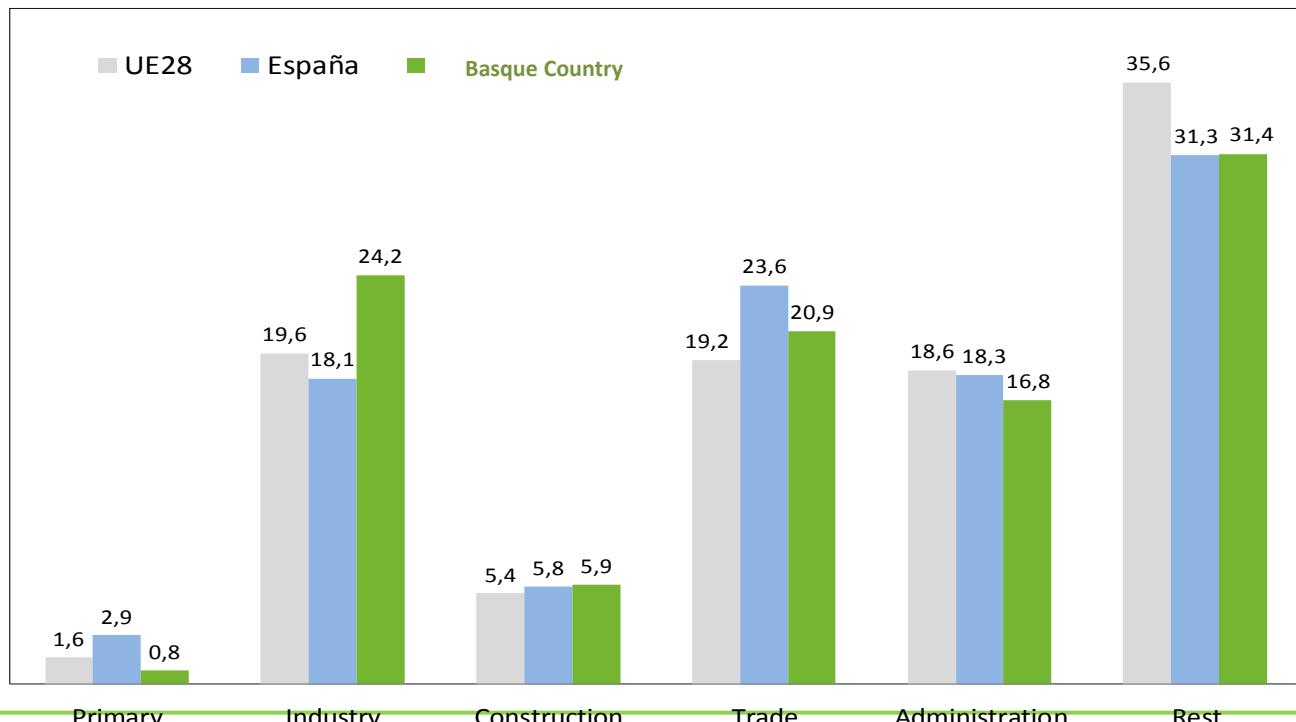

Source: CEPREDE. ISCRE 2018.

# Significant importance in the industrial sector

- It can be appreciated that the Basque Country has, in proportion, more industry than Spain and the European Union.
- By contrast, we have less services. Among these, it can be highlighted that the public administration (including public and private education, health and social services) has a relatively low percentage.
- The construction adjustment is surprising, reaching 10.3% of the added value in the times of the bubble (2007) and which is now almost at the European level.

# Beyond the GDP: Human Development Index 2017

- The GDP per capita is being criticised as an incomplete measure of welfare. For this reason, other indicators are being compiled. One of them is the United Nations human development rate.
- It also takes into account the GDP, life expectancy, years of schooling and literacy rate.
- The Basque Country is among the top 15 countries in the world in this indicator.

## Very high human development index

Puesto		%	Puesto		%
1	Noruega	0,953	11	Dinamarca	0,929

# Beyond the GDP: Regional Welfare Index

- This indicator bears in mind eleven different fields related to welfare. It is carried out by the OECD.
- In the Basque Country, the data is particularly good in terms of health and safety and community belonging.
- On the other hand, the results are relatively low in income (available income) and in civic commitment (participation in elections). In terms of employment, the result is somewhat modest.
- The two countries that stand out are Australia and Norway.

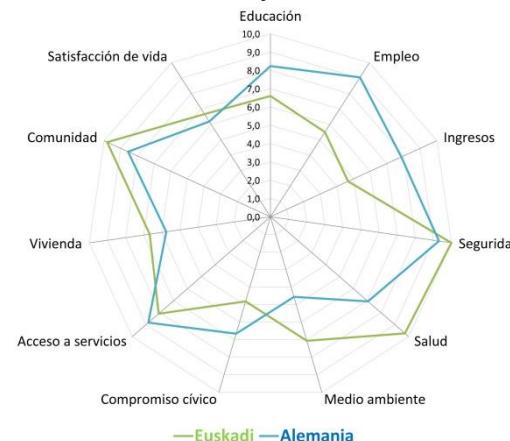

## Regional Welfare Index

### Basque Country- Norway

### Basque Country- Germany

### Basque Country-Spain

# Beyond the GDP: Regional Social Progress Index

- This indicator was established in 2016 by the European Commission for the 272 European regions. The Basque Institute for Competitiveness participated in its compilation.
- It includes 50 variables grouped into twelve fields.
- The Basque Country has a leading position in Spain and lags somewhat behind with respect to the European countries.

## EU-SPI Regional Social Progress Index

# Beyond the GDP: Risk of Poverty and Social Exclusion

- In this case, the Basque Country and two of the regions most related to our autonomous community: Navarra and La Rioja stand out.
- It is worth highlighting that the Basque Country is in a more favourable position than any European country, Spain is at the opposite end of the ranking.

Risk of poverty and social exclusion rate. 2018 \*

# Beyond the GDP: Inequality Indicators. 2016

- The most recent information available places the Basque Country among the most egalitarian regions in Europe, just behind Sweden and Finland (Gini Index) and behind the same two countries and Belgium and the Netherlands (Index S80/S20).
- The position of Spain at the opposite end of the ranking can also be appreciated here.

# Competitiveness: Human Capital. 2017

- Practically half of the Basque population between the ages of 25 and 64 have tertiary studies. This ranks us in first position in Spain and among the most advanced European countries in this variable.
- In the age group of 30 to 34, which is one of the objectives of Europe 2020 (to reach 40%), the Basque population reaches 55%, with a leading position in Europe.

Percentage of the population between the ages of 25 and 64 who have successfully completed tertiary studies

# Competitiveness: R&D Expenditure. 2017

- R&D expenditure has undergone a disappointing evolution in recent years. In 2010, it exceeded the European average, but since then, it has fallen and is now two decimal points behind Europe. However, in 2017 (1.85%) the result was better than in 2016 (1.81%).
- Spain is therefore a long way off the European average like the result for the Basque Country.

R&D Expenditure (% of the GDP)

# Innovation Indicators Panel (EIS)

- The Basque Country is among the countries with a high level of innovation (between 90% and 120% of the average). However, it is a long way off the leading countries in innovation (more than 120%), which is headed by Denmark and Sweden.
- It has improved by three hundredths of a decimal point in 2016. It is one of the greatest progressions.
- Spain is in the moderate innovation group (between 50% and 90% of the average).

Basque Country was at the same level as countries with a high level of innovation in 2017

Puesto	País	%	Puesto	País	%
1	Suecia	0,71	11	Francia	0,55

# An economy that looks towards the exterior

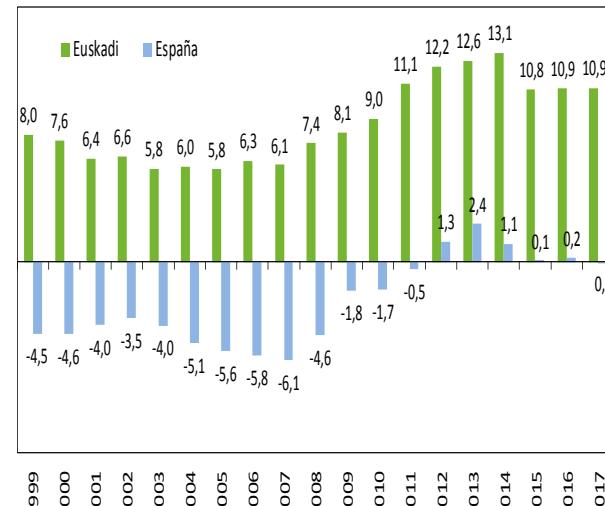

- In 2017, there was once more record exports of goods abroad, selling almost 24 billion euros. The improvement lies in the sale of energy products and in the rest. Record figures have also been reached for non-energetic products.
- The percentage balance of the GDP continues to be very high, compared with the national deficit.
- Record figures have also been obtained in the foreign trade of goods and services (abroad plus the rest of the State), with sales of over 47 billion euros.

## Foreign Trade: Trade Balance / GDP

Total Balance

Non-energetic Balance

Provisional data for 2017.

Source: Economy and Planning Department with data from Eustat and the State Tax Administration Agency.

# Proximity to foreign markets

- The European countries concentrate almost two thirds of their exports abroad. Furthermore, the Euro-Zone buys more than half of the total.
- France and Germany follow as the main destinations for Basque exports. The United States is gaining in importance.

Destination of Basque exports

	2008	2010	2012	2014	2016	2018

# Employment rate is slowly recovering

- The employment rate underwent a significant fall at the beginning of the crisis, going from 69% to 63%. This situation also arose throughout Spain and to a lesser degree in Europe.
- Since then, a recovery process has been followed and it returned to 69% in 2014. In 2017, the rate was 68%.

Employment rate of the population between the ages of 15 and 64

# International Environment: Growth of the GDP

- In the absence of more precise information, the data available suggests that 2018 was similar to 2017.
- Both the developed and emerging economies moderated their growth by one decimal point, the same as the Basque Country.
- The quarterly evolution shows a clear slowdown in Europe, even greater than that of the Basque economy.

	2017	2018	Year-on-year variation rate			
			2018			
			I	II	III	IV
World Economy	3.8	3.7	4.0	3.9	3.6	---

# Very slight slowdown of the economy

- The Basque Country has completed five years of recovery and its GDP far exceeds that of before the crisis. More specifically, that of 2018 was 7% above that of 2008.
- However, a slight slowdown in the quarterly evolution can be appreciated.

## Evolution of the Gross Domestic Product

Source: Prepared by the Economy and Planning Department with data from Eustat.

# Construction joins the upward trend in GDP

- Although the increase in 2018 is only one decimal point less than 2017, the quarterly evolution prevents us from talking about stability in growth. The slowdown is evident.
- Industry underwent a considerable moderation in the second half of 2018, which we think will be temporary.

## Evolution of the GDP on the supply side

	2017	2018	2018 variation rates			
			I	II	III	IV
GDP (p.m.)	2.9	2.8	3.1	2.9	2.6	2.4

# Strong boost of internal demand

- The gross capital formation highlighted its dynamism with respect to 2017, favoured by the recovery of construction.
- Private consumption is relaxing its progress to move closer to the increase in employment.
- The foreign balance is neutral. Both imports and exports have suffered a significant loss in the second half of the year.

## Evolution of the GDP on the demand side

	2017	2018	2018 variation rates			
			I	II	III	IV
<b>GDP (p.m.)</b>	<b>2.9</b>	<b>2.8</b>	<b>3.1</b>	<b>2.9</b>	<b>2.6</b>	<b>2.4</b>

Source: Eustat. Series adjusted for seasonal variation.

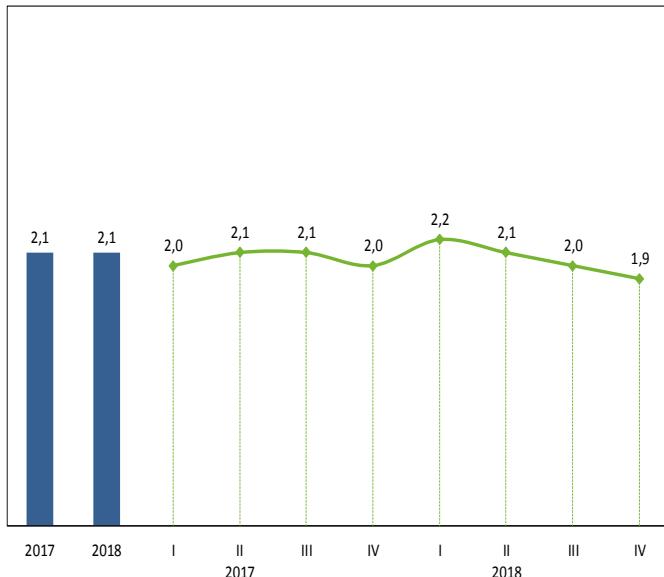

# Employment generation is maintained

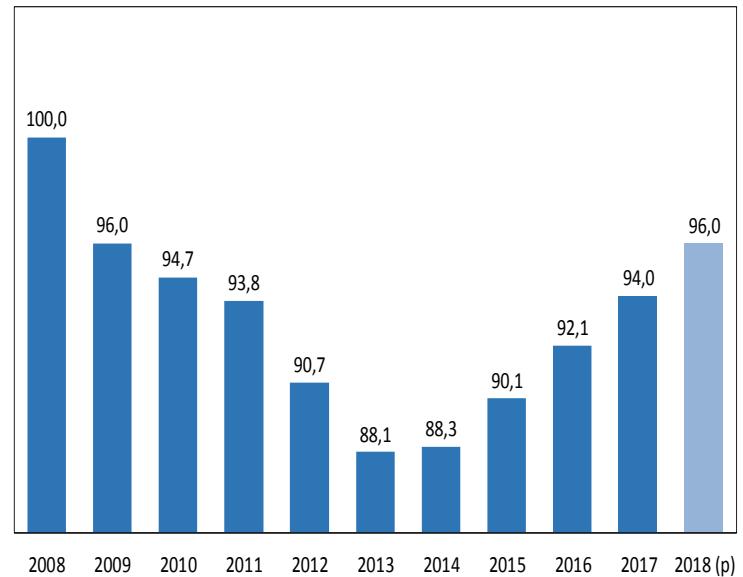

- The generation of employment continues to be important, at around 2.0% However, a slight slowdown in the pace can be appreciated, although it is less pronounced than that of the GDP.
- Just 4% of employment that existed in 2008 has yet to be recovered. In other words, around 40,000 full-time jobs.

## Evolution of Jobs

Year-on-year variation rate

Employment in 2008 = 100

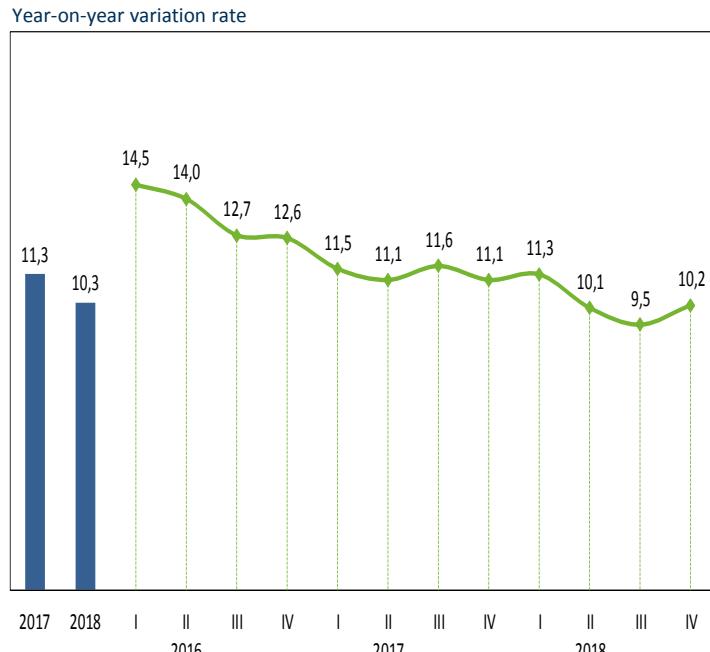

Source: Preparation by the Economy and Planning Department with data from Eustat. Economic accounts

# The unemployment rate is being moderated at a good rate

- The unemployment rate is around 10.0% in both surveys.
- The Basque Government's objective of reducing the unemployment rate below 10.0% in the current legislature is close to being fulfilled.

## PRA (Eustat)

## EPA (INE)

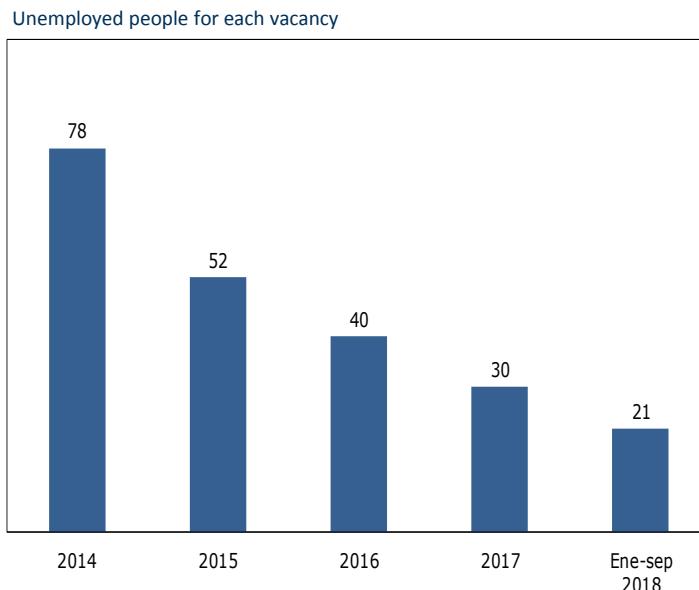

Source: Eustat and INE.

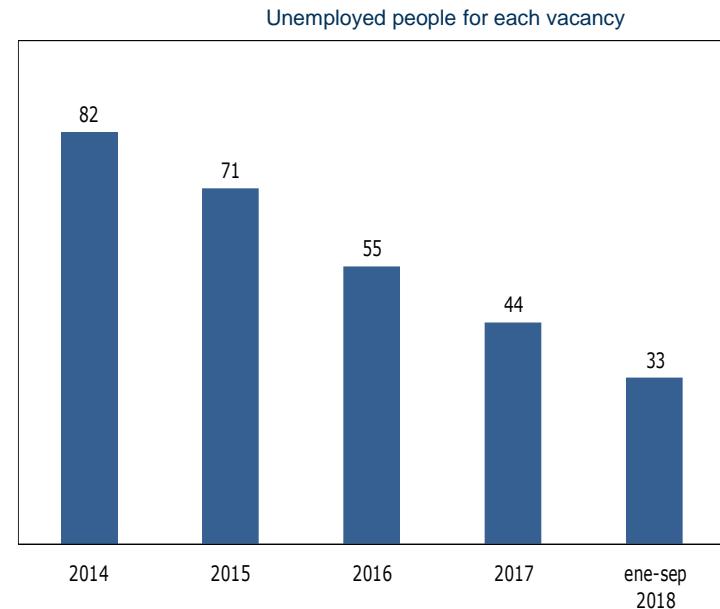

# Increased Employment Opportunities

- On one hand, the number of people unemployed will be reduced. On the other hand, the number of unfilled vacancies is increasing. For this reason, the ratio of unemployed people for each vacancy is being rapidly reduced. In the first quarter of 2018, this ratio was 20 unemployed people per vacancy.
- The same ratio for Spain was 34 people per vacancy.

Basque Country

Spain

Source: Economy and Planning Department with data from Lanbide and INE.

# Risks for the Economy in 2019

- The **trade war**, particularly between the United States and China.
- A more abrupt **slowdown** than expected **in China**.
- High **political risks**: Brexit, European elections.
- **Volatility** in the raw materials markets, such as oil.
- The standardisation of the **monetary policy** in the United States and Europe.

# World Economy Forecasts

- In 2019, world growth is expected to be somewhat less than that of 2018, but it will improve in 2020 thanks to the push of the emerging countries.
- The advanced economies will lose momentum over two years, due to the slowdown of the United States.
- The Euro-zone will not register significant variations with respect to 2018.

## World Economy Forecasts

	Year-on-year variation rates		
	2018	2019	2020
World Economy	3.7	3.5	3.6

## Forecasts by other bodies

- The forecast of the Economy and Planning Department is the most prudent of the results, which are delimited by 1.8% from Ceprede and 2.7% from Funcas and BBVA.
- In the case of BBVA, they estimate 2.3% for 2020.

2019

Source: Economy and Planning Department, CEPREDE (February 2019), BBVA (February 2019), Confebask (December 2018), Laboral kutxa (December 2018), Funcas (November 2018) and Hispalink (December 2018).

# Basque Government Forecasts: Demand Perspective

- In the absence of the updating of the forecasts, the calculation for December pointed towards continuity on the path of a gentle slowdown, due to lower momentum in consumption and investment.
- The external balance will hardly subtract one decimal point in the whole of the year.

## Evolution of the GDP on the demand side

	2018	2019	Year-on-year variation rates			
			I	II	III	IV
GDP (p.m.)	<b>2.8</b>	<b>2.2</b>	2.1	2.3	2.2	2.2

External Balance Contribution	<b>-0.1</b>	<b>-0.3</b>	-0.3	-0.3	-0.2	-0.3

Source: Economy and Planning Department (March 2019).

# Basque Government Forecasts: Supply Perspective

- By sectors, a slight loss of momentum is expected in the three main activities throughout the year.
- The incognito is industry, affected by questions that may be temporary, such as diesel and the new emissions regulation.

## Evolution of the GDP on the Supply Side

	2018	2019	Year-on-year variation rates			
			2019			
			I	II	III	IV
<b>GDP (p.m.)</b>	<b>2.8</b>	<b>2.2</b>	<b>2.1</b>	<b>2.3</b>	<b>2.2</b>	<b>2.2</b>

# Basque Government Forecasts: Job Market

- The still excellent evolution of the GDP will enable net employment to continue being generated this year, although at a slower rate than the 2.0% in recent years. We calculate an advance of 1.5%, compatible with increased productivity of around 0.7%.
- The unemployment rate will go down from the annual average of 10%. The reduction in the number of people unemployed and the arrival of new job seekers will prevent the unemployment rate from rising to the rate of recent years.

## Evolution of employment and unemployment rate

	2018	2019	Year-on-year variation rates			
			2019			
			I	II	III	IV
Employment	2.1	1.5	1.7	1.6	1.6	1.4
Unemployment Rate	10.3	9.9	10.4	10.0	9.6	9.8

Source: Economy and Planning Department (March 2018).

# Conclusions

- **2018 was yet another good year** from the point of view of the GDP and employment. The former grew by 2.8% and the latter by 2.1%. Around 19,000 net jobs were created.
- **The growth of the Basque GDP was higher than that of the European average**, whereby there was another relative improvement, placing the GDP per capita at around 121% of the European average.
- **Internal demand shows a great deal of dynamism**, compared with a neutral external balance, hardly adding or deducting anything to the increase. Furthermore, the brake on international trade does not help.
- Construction has accelerated its dynamism, whilst **industry has had fleeting problems** in the second half of the year, related to the new emissions and diesel regulation.
- **The main risks for the world economy in 2019** are: the trade war, political tensions, standardisation of the monetary policy, the volatility of oil and doubts with respect to China.
- In a scenario in which the European economies are growing less, **the Basque economy will increase its GDP in 2019 by 2.2%**. This is one of the most prudent forecasts of those published.
- **Employment will increase by 1.5%**, which is equivalent to the generation of around 13,500 full-time jobs.
- **The unemployment rate will be below an annual average of 10.0%**.

# Sustainability mandate of the Basque Government (1)

The Basque Government has an Agenda Euskadi Basque Country 2030 that reflects the degree of alignment and contribution of the Government Program with the 17 Sustainable Development Goals and 100 targets of the UN 2030 Agenda for Sustainable Development (Agenda 2030).

We see Agenda 2030 as an opportunity for the Basque Country because it is fully in step with our priorities: human development guaranteeing essential services for all, and sustainable growth generating job opportunities to higher levels of quality. This is the Basque model of growth and social welfare, now strengthened by the presentation of Agenda Euskadi - Basque Country 2030.

This Agenda Euskadi Basque Country 2030 represents a decisive step in the determination of the Basque Executive to focus its public policies on the challenges identified in the Agenda 2030 of United Nations. It is the First Agenda Euskadi Basque Country 2030 whose temporal scope covers the period 2016-2020.

It includes 93 of the 175 commitments acquired by the Basque Government in its Government Program, 80 Planning Instruments, 19 Legislative Initiatives and 50 Indicators. An effort that will make it possible to effectively align public policies in Euskadi with this universal Agenda 2030, and make visible the contribution of Euskadi to the implementation of the Agenda 2030 and the achievement of the Sustainable Development Goals.

# Sustainability bond framework at a glance

This Sustainability Bond Framework is aligned with the Green Bond Principles (GBP), Social Bond Principles (SBP) and Sustainability Bond Guidelines 2017. Bonds issued under this framework will promote the UN Sustainable Development Goals Agenda 2030.

The net use of proceeds will be used to finance and/or refinance eligible categories and projects are included in the General Budget and corresponding budgetary programmes of the Basque Government and will always be part of the current budget of the fiscal year of issuance date of each Sustainability bond.

Eligible categories are: Affordable Housing, Access to essential services: Education and Healthcare, Socioeconomic advancement , Employment generation , Renewable Energy, Clean Transportation, Pollution prevention and control, Sustainable water and wastewater management, Terrestrial and aquatic biodiversity conservation, Energy Efficiency and Climate Change Adaptation

A robust project evaluation and selection process will be undertaken by the Basque Government when reviewing the allocation process: the Basque Government Sustainability Bond Committee evaluates their compliance with the defined relevant eligibility criteria

The Basque Government will report on impact on each Sustainability Bond issued within 12 months since settlement date.

Supported by an external review: Sustainalytics has provided with a Second Party Opinion which will be available on the issuer's website as well as the Sustainability Bond Framework.

# Sustainability bond framework: use of proceeds (1)

Eligible Categories	Framework	SDG
Affordable Housing	<p><b>The proceeds will be used to promote and increase the availability and access to social housing in the Basque country</b></p>	
Access to essential services: Education & Healthcare	<p><b>Education:</b> proceeds of the bond will be allocated to support public educational programmes for young people between 14 and 25 years old and to support the successful integration of disadvantaged groups in the education system. Disadvantaged group refers to young people in a situation of greater vulnerability because they have not finished Compulsory Secondary Education (ESO).</p> <p><b>Healthcare:</b> proceeds of the bond will be allocated to projects aimed to guarantee universal access to quality public health care for the citizens of the Basque country (including, but not limited to, vulnerable groups).</p>	
Socioeconomic advancement	<p><b>Proceeds of the bond will be allocated to projects that maintain and foster the Basque income guarantee model and promote social inclusion in the Basque country</b></p>	
Employment generation	<p><b>Proceeds of the bond will be used to support employment generation in the different economic sectors and to finance programmes that support unemployed people in education and training, in order to reduce the unemployment rate below 10% by the end of the term</b></p>	
Renewable Energy	<p><b>Proceeds of the bond will be allocated to projects and programmes aimed at promoting the increase of renewable energy in the Basque Country. Proceeds will be used to finance the renewable energy priorities included in the Euskadi Energy Strategy 2030 ("Estrategia Energética de Euskadi 2030"); Wind, Biomass (waste to energy), Solar Photovoltaic, Geothermal and Marine renewable energy.</b></p>	

# Sustainability bond framework: use of proceeds (2)

Eligible Categories	Framework	SDG
Clean Transportation	<b>Proceeds of the bond will be used to reduce the dependence on fossil fuel transport in accordance with the lines of action included in the Master Plan for Sustainable Transport of Euskadi 2030.</b>	
Pollution prevention and control	<b>Proceeds of the bond will be used to improve the quality of water, air and soil, managing environmental risks and reducing human diseases related to environmental determinants, in accordance with the lines of action set out in the Environmental Framework Programme 2020 and the Biodiversity Strategy of the Basque Country 2030.</b>	
Sustainable water and Wastewater Management	<b>Proceeds of the bond will be allocated to projects and programmes that will support the protection and improvement of the ecological state of water masses; projects and programmes that will support not only the improvements of water quality and its supply, but also the sanitation and urban sewage treatment. Additionally, proceeds of the bond will be allocated to resolve water scarcity, waste minimization of water consumption, or recycling to alleviate sewage water generating.</b>	
Terrestrial and aquatic biodiversity conservation	<b>Proceeds of the bond will be allocated to projects and programmes aimed at promoting protection and restoration of ecosystems in the Basque Country as it is included in the Biodiversity Strategy of the Basque Country 2030.</b>	
Energy Efficiency	<b>Proceeds of the bond will be used to build a low carbon energy model and anticipate the risks of climate change following the guidelines and lines of action foreseen in the 2030 Euskadi Energy Strategy and 2050 Climate Change Strategy Basque Country (Klima 2050).</b>	
Climate Change Adaptation	<b>Financing of plans of action and activities to reduce the impacts of extreme climatic events in vulnerable areas, such as flood prevention, landslide, impact in coastal areas, etc .</b>	

# Sustainability Bond Framework: Process for Project Evaluation and selection & Management Proceeds

## Process for Project Evaluation and Selection

- The process to select and to evaluate potential eligible projects and programmes from the General Budget is performed by the Basque Government Sustainability Bond Committee
- This Committee comprises four representatives of the Department of Finance and Economy, and a representative of each of the following departments: Environment, Territorial Planning and Housing; Employment and Social Policies, Health and Education, Economic Development and Infrastructure
- Each Department carries out an ex - ante evaluation of the impact indicators of the projects, in addition to the environmental impact assessment, and other actions foreseen in the regulation

## Management of Proceeds

- The Basque Government has internal systems in place to track proceeds of its bonds, and to account for all eligible programmes → the Committee will monitor and prevent any such double allocation of proceeds
- The proceeds of the Sustainability Bond will be allocated to eligible budgetary programmes in the General Budget of the Basque Government, corresponding to the fiscal year of the Sustainability Bond issuance
- The total expenditures required for the eligible programmes will equal or exceed the net Sustainability bond proceeds
- The proceeds from the Sustainability bond issuance will be directly allocated to the eligible projects at settlement. In the event the whole proceeds cannot be allocated, the Basque Government will temporarily keep the unallocated funds in any form of cash or liquidity position or time deposits with banks. This event would be monitored by the Financial Department of the Basque Government's Financial Policy Department and reviewed by the Sustainability Bond Committee

# Sustainability Bond Framework: Reporting

## Allocation Reporting

- the Basque Government committed to report on an annual basis on the allocation of the bond's proceeds, including the total amount allocated and per eligibility category until the proceeds have been fully allocated
- Allocation reporting will be available to investors within one year from the date of the Sustainability Bond issuance and annually until the bond proceeds have been fully allocated. The reporting will produce insights into the total amount provided to the various eligible budgetary programmes and the total of each eligibility category. The allocation reporting will be made available on the Basque Government's website .

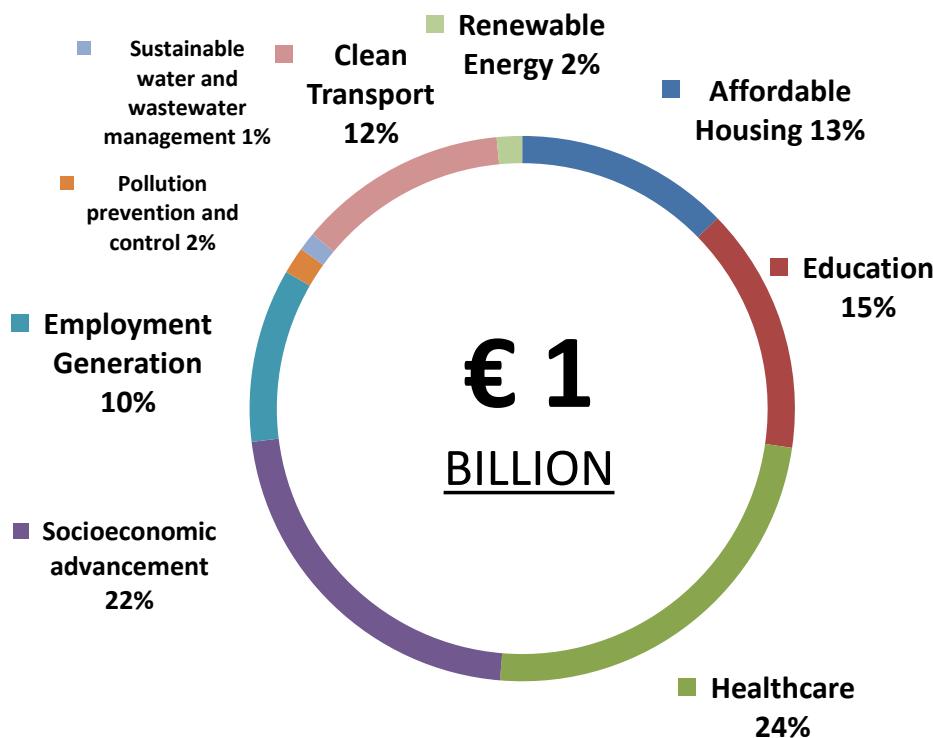

## Impact Reporting

- Impact indicators are developed for each eligibility category
- The Basque Government will provide a dedicated Sustainability Bond impact report for investors within one year from the issuance date and annually until the bond proceeds have been fully allocated, with estimates of the main environmental or social impacts or outputs of the eligible programmes, where feasible
- Impact indicators will include avoided CO<sub>2</sub>, renewable energy and energy savings as well as poverty rate and school enrolment rate, among others
- Some case studies of projects may be provided to illustrate the positive impact

7311Energy (EVE group without SHESA)	26,526,476	15,000,000	
	245,244,664		<b>166,500,000</b>

# External Review

## Sustainalytics

- **The Basque Government engaged Sustainalytics** to provide a review of the Basque Government Sustainability Bond Framework and provide a second-party opinion on the alignment of the sustainability bond with the Green Bond Principles 2017 (the “GBP”), Social Bond Principles 2017 (the “SBP”) and Sustainability Bond Guidelines 2017, as administered by the International Capital Market Association (the “ICMA”), and the framework’s environmental and social credentials.
- Sustainalytics held conversations with various members of the Basque Government team to understand the sustainability impact of their business processes and planned use of proceeds, as well as management of proceeds and reporting aspects of the Basque Government’s sustainability bond. Sustainalytics also reviewed relevant public documents and non-public information.
- **Sustainalytics conclusion**
- The Basque Government intends to issue multiple bonds that finance projects and programmes that address the regions social and environmental challenges and overall contribute to the UN Sustainable Development Goals.
- The eligible categories and target populations are aligned with the Green and Social Bond Principles and Sustainalytics considers the use of proceeds to be impactful given the overlap of the Basque Government’s focus on electric transportation, renewable energy and target populations that overlap with particularly vulnerable populations identified by EU strategies. In addition, the Basque Government project selection and evaluation, management of proceeds and reporting is aligned with market practices, including the integration of environmental and social criteria into the Basque procurement policies.
- Based on the above points, Sustainalytics considers the Basque Government’s Sustainability bond to be robust, credible and transparent.

## Financing System

- The Basque Country's financing system is different to the other autonomous communities in Spain, and it has its own tax system.
- Full authority to manage, levy and collect practically all taxes.
- Relations between the Basque Country and the Spanish State are governed by the Economic Agreement.
- The Basque Country collects and contributes with the relevant quota to the services that the Spanish State continues to provide in this area.

# Financial Strategy

1. To regularly issue sustainability bonds in upcoming years of around 500-600 M€
  - To expand the investor base with sustainable bonds
  - To strengthen liquidity
1. To increase the average maturity of the debt by issuing lower amounts at a longer period
2. To diversify funding, by combining issues and loans

# Basque Government 2018 €500m Inaugural 10yr Sustainable bond

1.45% due April 2028

On 5<sup>th</sup> June 2018, HSBC acted as Joint Bookrunner on the highly successful inaugural Sustainable 10y transaction for the Basque Govt

The deal represents the first transaction from a Southern European borrower in the aftermath of the Italian political crisis and the issuer's comeback to Benchmark Euro capital markets

The transaction was preceded by an extensive European Roadshow, which along with the SRI angle resulted in a outstanding international participation accounting for 66% of the total allocation

Strong demand of EUR 1.6bn allowed Basque Government to print at SPGB+15 bps, the tightest spread vs. Bonos achieved by a Spanish region in a public benchmark and -5 bps inside IPTs

The deal consolidates HSBC's #1 position in the Spanish Public Sector and Sustainable Capital Markets and it is a testament of strong perception of Basque Country among the international investor community

# The debt of the Basque Country is subject to the same regulation as the State debt

**Article 135 of the Constitution states ... ". Loans to meet payment on the interest and capital of the State's Public Debt shall always be deemed to be included in budget expenditure and may not be subject to amendment or modification as long as they conform to the terms of issue.".**

**In terms of Organic Law Article 14.5 of the Law on Financing of the Autonomous Communities states:** "The public debt of the autonomous communities and the securities of an equivalent nature issued by them shall be subject, to the same rules and shall enjoy the same benefits and conditions as the Public Debt of the State".

**Article 14 of the Organic Law 2/2012 of 27 April on Budgetary Stability and Financial Sustainability** provides: "The payment of interest and principal on the debt of public administrations shall have absolute priority over any other expenses" .
