Search for European partnership - High schools

As a Europe Direct Information Center we often are contacted by schools that are looking for partners, especially companies in Europe that would be able to host interns. As regional office in the area of Bruxelles, the contact that you have locally could help them find partners in order to send their students abroad.

Two high schools located in the Pyrénées-Atlantiques are currently looking for intern placement for their students. The types of internships that those high schools would like to offer to their students are: short term period as a group of students or medium term internship (1 month). Most of the students are aged between 16 and 18 years old.

The agricultural college of Mauleon is looking for company in the field of:

- Management of a farm
- Management of Cats and Dogs breeding
- Services to people and territory
- Technician adviser in the sale of pets

The high school of Gelos is looking for training placement in the field of:

- Carpentry
- Plumbing
- Painting
- Electricity

Both high schools are willing to help other educational institutions in Europe working in the same field to find training placement in the Pyrenees Area.

Would you have further question, our EDIC will be happy to respond to you.

Best regards,

Pauline Baudou
