Organisation	SEIT (Software Engineering and Internet Technologies) Lab Department of Computer Science University of Cyprus (http://www.cs.ucy.ac.cy/seit/)
Programme and call for proposal	INTERREG Europe 2nd Call for proposals (http://www.interregeurope.eu/projects/apply-for-funding/) Deadline: 13 May 2016
Description	The SEIT Lab has extensive expertise in the practical use of ICT in a number of areas, such as e-Health, e-Business, e-Government, e-Learning, environmental and energy related matters, as well as issues of entrepreneurship and innovation. It has participated in many EU funded projects, including several Framework and H2020 Programmes and two Interreg IVC ones. Furthermore, as the University of Cyprus is the primary state university in the country, it has close links with local, regional and national authorities and policy makers, who can be invited to participate in an Interreg proposal.
Outline	In the INTERREG EUROPE programme ICT (Information and Communication Technologies) still play an important role, but this time as a cross-cutting theme that links in with the other thematic objectives. Therefore, proposals are expected to make good use of ICT, according to the thematic objective they address, as well as their individual aims and scope.
