

December 18: International Migrants Day

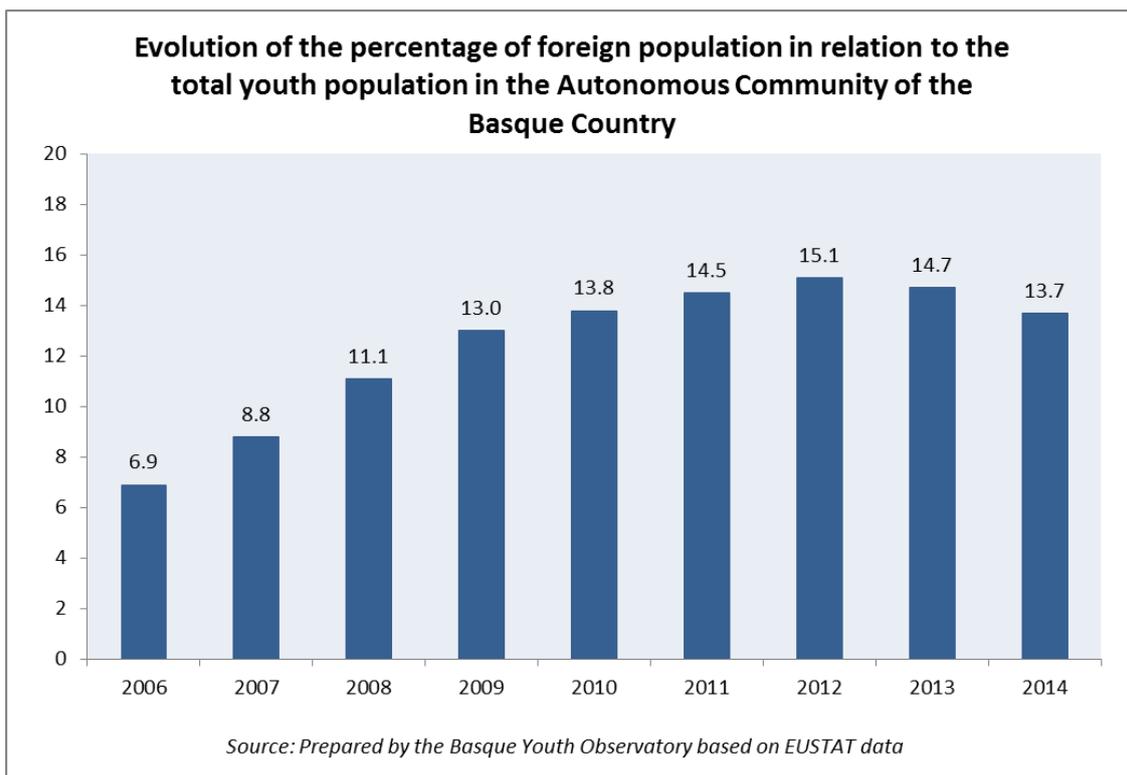

More than a quarter of the foreign people registered in the Basque Country are young people aged 15 to 29.

On occasion of the International Migrants Day, the [Basque Youth Observatory](#) is publishing data on foreign youths registered in the Autonomous Community of the Basque Country.

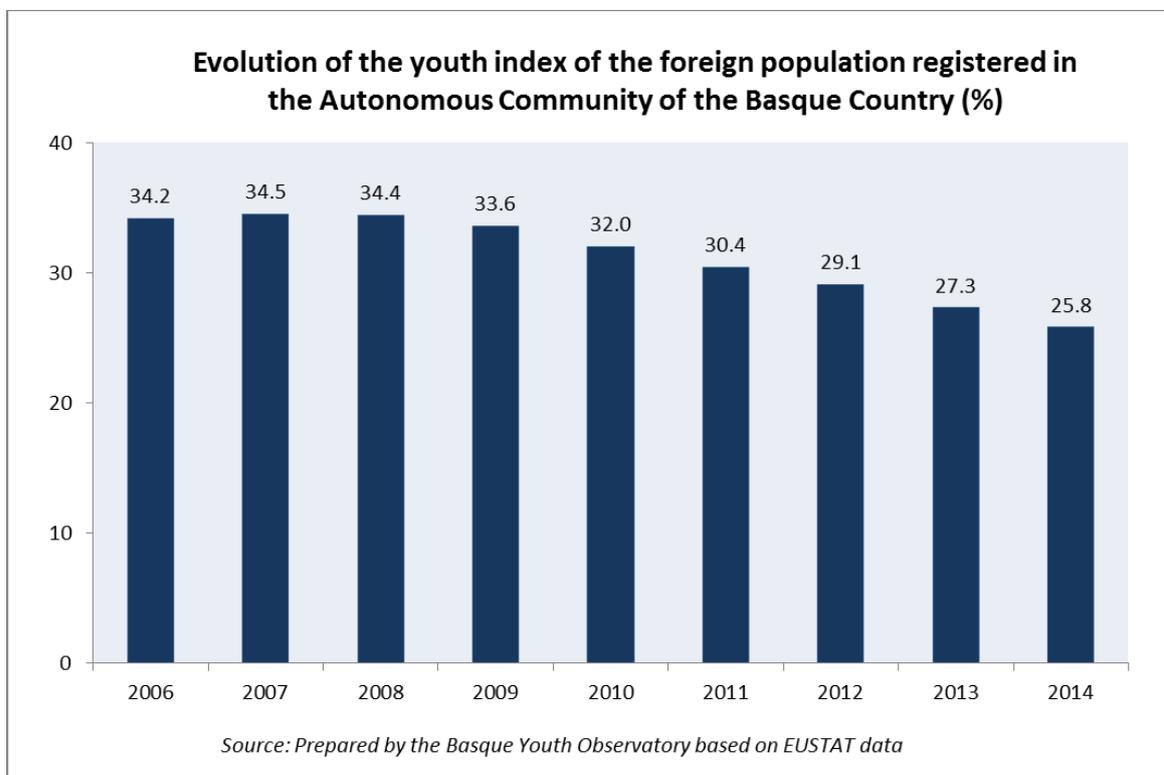

According to data from EUSTAT's Municipal Population Statistics, there were 40,484 foreigners aged 15 to 29 registered in the Basque Country in 2014, of which 20,559 were women and 19,925 were men. Since 2012, when the numbers peaked at 46,554 young foreigners, there has been a downward trend.

The percentage of young foreigners in relation to the total youth population of the Autonomous Community of the Basque Country increased between the years 2006 (6.9%) and 2012 (15.1%), after which it began to fall.

Finally, if we look at the youth rate among the foreign population registered in the Basque Country, which represents the percentage of people aged 15 to 29 in relation to the total population, we find that one fourth (25.8%) are young people between 15 and 29 years of age.

These data and other breakdowns can be found in the Statistics of the Basque Youth Observatory, more specifically in the Population section.
