# Estrategia Rotterdam

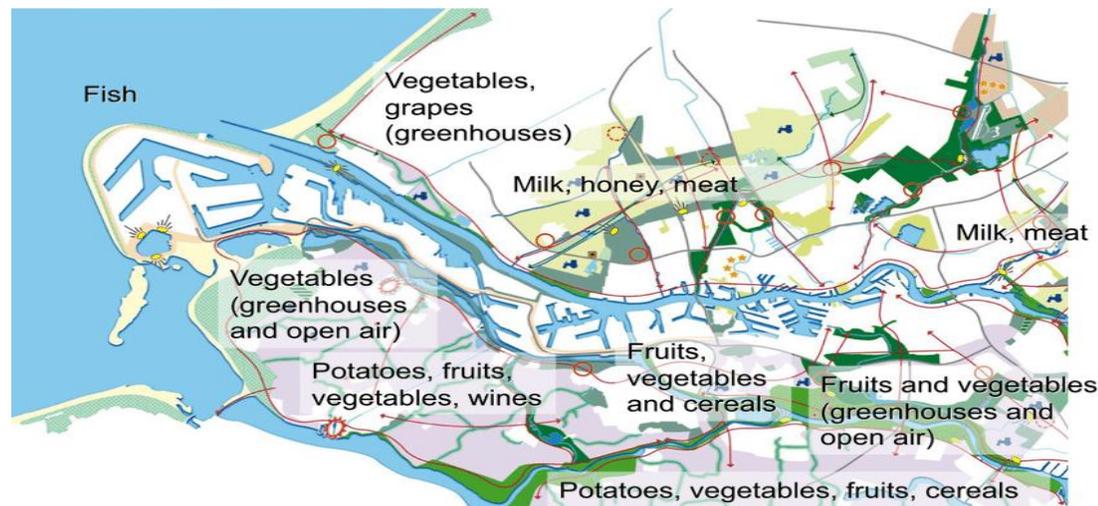

The Netherlands is poised to become a frontrunner in food for an urban world with its Randstad agriculture. Rotterdam's food cluster is a model that receives attention in an increasing urbanized world and the Netherlands has a leading position in the field of urban farming systems, being specialized in indoor farming equipment and knowledge.

# Estrategia París

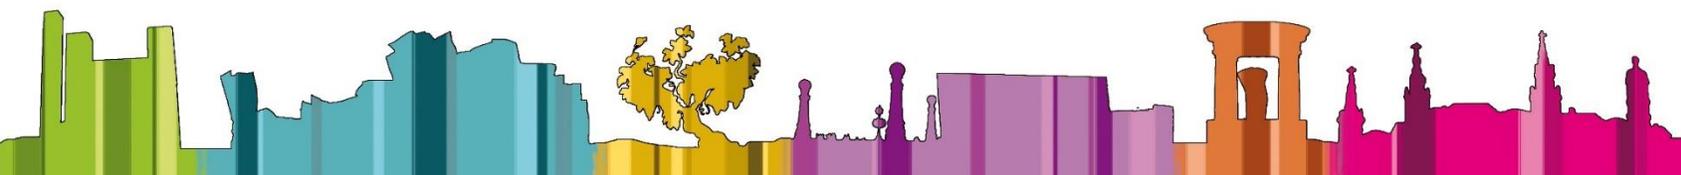

Since being elected in 2014, the city's Mayor Anne Hidalgo has been on a mission to make Paris a greener city. The French government's [Parisculteurs](#) initiative aims to cover 100 hectares of the city's rooftops, walls and urban spaces with plants by 2020. One-third of this space will be dedicated to urban agriculture.

# Estrategia Toronto

Toronto's food policy leadership is recognized globally. Vibrant markets, neighbourhoods, and restaurants attract millions of tourists. The food sector accounts for one in 10 jobs in the city. A vibrant food movement has developed a mosaic of gardens, farms, kitchens, and community spaces centred on good food.
